

Prevent Early Failure and Damage to Your AC System.

SureSwitch™ Relay

Universal Electronic Upgrade
for Mechanical Compressor Contactors

49P11-843

5 Important Reasons to Upgrade

- 1. Pest Protection:** Totally sealed to keep out ants and debris; no pest control treatments needed for outside AC or Heat Pump units.
- 2. 5X Life vs. Traditional Contactor:** Microprocessor control nearly eliminates contact damage.
- 3. No Noise:** Latching internal relay won't hum or buzz.
- 4. Time Delays:** Protect your system when re-starting between regular cycles or after power interruptions.
- 5. Low Voltage Brownout Protection:** Detects and protects system from low voltage events that can cause compressor and fan motors to overheat and fail prematurely.

Applications

Electronic upgrade for mechanical AC/Heat Pump compressor contactors Ideal install with new Preventative Maintenance Contract

Benefits

1. Sealed switching contacts, no bugs or debris issues
2. Microprocessor detects and mitigates arcing that damages traditional contactors
3. integrated short cycle and random startup timer
4. Integrated 220V brownout protection
5. Super quiet latching relay, no buzz or hum
6. Status LED

**Upgrade and Protect Your AC
or Heat Pump Investment**
