

# PCO PLUS

PCO Plus combines photocatalytic oxidations with UV light technology to help **reduce airborne viruses by more than 90%\*** in a few air exchanges. It also helps to remove harmful bacteria, viruses, and toxic gases in your customers air and eliminate household odors.

## Helps eliminate odors through activated oxygen caused by:

- Food
- Household Cleaning Chemicals
- Paint & Building Material
- Pets
- Carpet, Flooring, and Composite Wood Products
- Tobacco
- Bacteria & Viruses

PCO Plus is a chemical-free solution that is safer for your customers, equipment, and environment. It also produces less ozone than its competitors and can easily be installed into their HVAC system to help clean the air that filters through, while also helping to keep their equipment cleaner and working more efficiently.

\*See substantiation in the May 12, 2022 "Microbiology Report" from LMS Technologies, Inc., page 5.
